

KingPulse Whitepaper v1.0

Date: 2026-05-16

Website: <https://kingel3ba.com>

1) Executive Summary

KingPulse is a transparency-first public web surface for the KPL token on Monad. The website exposes live on-chain readouts through public RPC, while user transactions are available only after explicit wallet connection.

2) Official Contract Policy

This website recognizes one official contract only:
0x740d1dcF13CDd101e34dDdCE6E4B9e350Ae3373c
Operational observation reference date: 2026-05-15.

3) Network and Token Profile

Network: Monad Mainnet (Chain ID: 143)
Token: KingPulse (KPL)
Decimals: 18
Public runtime config endpoint: /kpl/runtime-config.json

4) Product Scope

- Public read-only dashboard without wallet requirement.
- Wallet-enabled user actions: transfer, approve, burn, balance lookup, allowance lookup.
- No public administrative web console exposure.

5) Utility Scope

KPL utility includes transferability, approval allowances, and burn capability. No statement in this document should be interpreted as guaranteed financial return.

6) Governance and Security Posture

- Governance-sensitive keys and owner actions must remain off-web.
- owner() and paused() should be checked on-chain as part of operational hygiene.
- Private keys must never be exposed.
- Material operational updates should be publicly disclosed.

7) Risk Notice

Digital assets involve market, technical, and regulatory risk. Participants are solely responsible for their own legal and financial decisions.

8) Roadmap (High Level)

Phase 1: Unified official contract surface and disclosure baseline.
Phase 2: Enhanced observability and reliability of live state views.
Phase 3: Broader integration with on-chain analytics workflows.

9) Legal Disclaimer

This whitepaper is informational only and does not constitute legal, tax, or investment advice.
